

# How to Download a mp3 For Playback on Your Computer or mp3 Player

1) **RIGHT** click on the mp3 audio link. A window will appear that should look like this:

2) click “save target as” and this window should appear:

**3) Make sure to save it somewhere you can find it – on your desktop or in “my documents”. You choose that by clicking on the appropriate icon on the left side of the dialog box.**

**4) Click save**

**The file will then download to your computer.**

**These instructions are for Internet Explorer. If using Firefox follow the same instructions but choose “save link as” instead of “save target as”.**
